A versatile creator with skills ranging from designing and building websites to developing apps. Over the past 2.6 years, I have dedicated myself to crafting websites and apps from the ground up.

SKILLS

Front End Development – HTML, CSS, Javascript ,ReactJS, NextJS, Flutter.
CSS framework – MaterialUI, TailwindCSS, Styled Components
Back End Development – NodeJS, Python, Flask.
Database – SQL (basics) , Firebase.
Other: Git, Agile Methodologies, Sprint, Figma.

WORK EXPERIENCE

Alltramatic | ReactJS, Firebase, NodeJS, MaterialUI, NextJS
Frontend Developer (August, 2021 – Present)
Website - https://lawnber.com/

1. Played a key role in the design process using **Figma**, ensuring seamless alignment with confirmed design specifications.
2. Executed precise frontend coding in ReactJS and NextJS following design approval, contributing to the creation of a dynamic and user-friendly website.
3. Implemented robust backend service with NodeJS, ensuring the seamless functionality and performance of the entire application.
4. Orchestrated the hosting of the website on Heroku.
5. Successfully implemented a comprehensive SEO strategy, achieving a notable increase in the website's ranking from 0 to 11 DA, enhancing its visibility and online presence.
6. Contributed significantly to business expansion, with the crafted website attracting and retaining over **40** customers.

INTERNSHIP

SocialScript | Webflow
UI/UX Designer (December, 2020 – January, 2021)

- Designing websites for clients using Microsoft Webflow, demonstrating proficiency in crafting visually appealing and functional digital solutions.

Lawnber | Flutter
Mobile App Developer

- Contributed to the development team by designing an flutter app for robot control, employing MQTT as the communication protocol
- Integrated Firebase database seamlessly into the application to enhance data management and synchronization capabilities.
